Subject: Imaging Spectroscopy

Hi, Steve.

I submitted a request to USGS looking for any research that has used imaging spectroscopy in Colorado for the same purposes or in the same manner as that done for *Imaging Spectroscopy Applied to the Animas River Watershed and Silverton Caldera*.

In the meantime I did find another paper that discusses the use of imaging spectroscopy in Leadville: *Using Imaging Spectroscopy to Map Acidic Mine Waste -* <http://speclab.cr.usgs.gov/PAPERS/leadville99/leadville.PDF>. It includes a photo that is very similar to the one of the Silverton area.
